

HUNTERS HILL TECHNOLOGY COLLEGE

VISION STATEMENT

We will work together to ensure that all children benefit from the highest standards of teaching and learning and care and are inspired, supported and prepared for the ultimate transition to life as young adults in a fast changing world.

This means that we must draw upon all the professional skills, talents and expertise to create a learning community that enables every adult to make the greatest contribution possible and play their full part in fulfilling this commitment to our children.

We will do this through systems which monitor the impact of all teaching and care practices so that self-review drives our efforts to constantly improve. We will embrace the opportunity to work with other schools in alliances and partnerships which are underpinned by trust, professional respect and collaborative working in order that we hold ourselves to account for the quality and impact of our work through a culture of invitational leadership.

The constant professional development of our staff team will ensure that everyone who works at Hunters Hill is provided with support and development opportunities in order to be the very best they can be. We will first consider 'what can we give?' as our basis for being part of this team with the knowledge that the more you give, the more you are likely to receive in return. Our aim is to invest in social capital and a collective mind set so that we have a rich community of mutual support.

We are facing a unique opportunity to develop our practice into something even more unique and specialised for our students and we will grasp this with collective professionalism, expertise, and an unflinching moral purpose.

**Andrew Dawson
Head Teacher**
